

## ECO-FRIENDLY KD3 TERMINAL BLOCK END STOPPER

KD3 end stop is an environmentally friendly product manufactured from recycled raw materials.

It provides the same performance, durability, and functional characteristics as products made from standard materials.

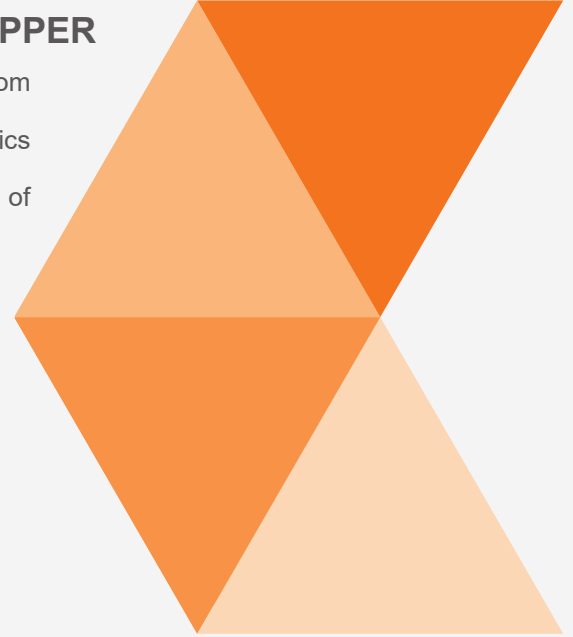

With its sustainable production approach, it contributes to the reduction of carbon footprint.

The product is black in color and suitable for industrial applications.

### Field of Use

- Electrical control panels
- Industrial machinery
- Power distribution systems
- Automation systems
- Distribution boards
- Building electrical installations
- HVAC (Heating, Ventilation and Air Conditioning) systems
- Renewable energy systems

### Certificates
